

HUBER S-Disc Thickener Getting Popular

Energenecs recently completed another HUBER S-Disc sludge thickening system for the City of Medford, Wisconsin this summer. The S-Disc is becoming more popular throughout the state for its small footprint and performance. In addition to Medford, the S-Disc is also running in Sister Bay and at a cheese plant in southeastern Wisconsin, plus an installation is scheduled for early 2022 in Twin Lakes. We spoke to Steve Berggruen, technical sales at Energenecs about this innovative technology, read about it at energenecs.com/sdisc

Energenecs' 3rd WWOA Lifetime Member

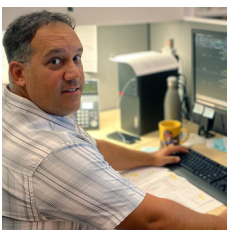

Energenecs is proud to announce that Gary Dean has been recognized as a WWOA Lifetime Member. Gary joins Energenecs team members Bob Lecey and Dan Waala with this honor. Gary has been with Energenecs for over 31 years in aftermarket sales. He previously worked at the Waukesha City Wastewater Plant. Bob Lecey, P.E., has been with Energenecs for over 30 years in technical sales. Dan Waala joined the Energenecs aftermarket sales team in 2019. For 30 years, Dan was a wastewater operator for the City of Brookfield, the City of Waukesha and the plant supervisor for the Village of Jackson. Read more at energenecs.com/lifetime

Brian Mentink joins the Team!

Brian is a Certified Master Electrician and joined Energenecs as a Project Manager and Electrical Controls System Designer. His last name might sound familiar, as he is the brother of Brad Mentink, the Operations Manager at Energenecs! Brian and Brad both worked side by side at DeTroye Electric Services for quite a few years before Brad went over to Energenecs and will be working with him again, as all of the project managers report to Brad. Brian remarks "Working together as a team is so very true at Energenecs... It's a great environment to be in, I love it." Read more at energenecs.com/brianmentink

Welcome Brian Fuller to the Team!

Brian recently joined the Energenecs team as a computer aided design (CAD) Technician. Brian worked at Powrtek Engineering for over 18 years after graduating from ITT. At Powrtek the CAD work was for wastewater treatment plants and lift stations, in addition to buildings, roadways and airports. In his free time, he builds and operates remote control cars and trucks with his son. One of the cars goes about 80 miles per hour! Read more at energenecs.com/fuller

Meet Brad Mentink Operations Manager

Brad has been with Energenecs since 2012 as the Operations Manager. He has been in controls for the past 20+ years, and in water and wastewater for the past ten.

His responsibilities are to make sure all the different aspects of the team are working together, communicating, coordinating schedules, and helping to define priorities. Brad makes sure that the customer is taken care of through the various aspects of our projects. Whether that be the contractors Energenecs is working with, the end customers or the engineers, he strives to maintain good communications.

He also makes sure everyone internally in Energenecs is working together, and is on the same page. He primarily works with the controls team, as well as the process team because there is so much interaction between the two. He also works with some of the aftermarket group, and service team as well, helping out where he can. Brad remarks

"I see it as one Energenecs team, where we all work together."

Brad really enjoys woodworking, it's a hobby he has been doing since high school. He has built a few pieces of furniture like end tables and dressers, jewelry and music boxes, kids toys, basically anything his wife and daughters dream up.

Another hobby he has is cycling. He rides with a group of guys from the Oostburg area, the Lakeshore Loopers, a couple of times a week. Last year he put about 5,000 miles on his bike! Read more about Brad at energenecs.com/bradmentink
