

Data! Data! Data!

Energenecs recently provided an updated SCADA system, two well house panels, two elevated tower panels and six new lift station control panels (one stormwater, four wastewater and one more on the way) for Monee, a village in Will County located about 26 miles south of Chicago, Illinois. According to Brian Akason "it's elegant, it's unbelievable. This well house has more information in it than any well house I've ever dealt with!". The project entailed a new 500,000 gallon elevated tank, well, well house, and Supervisory Control and Data Acquisition (SCADA) system to improve safety and reliability of Monee's water distribution system. Read more about this data-focused project at energenecs.com/monee

The Path of an Alarm Signal

What should you do when you receive a notification of an alarm? Nate Wolfe, an Energenecs SCADA technician, has provided information to give an understanding of a typical radio SCADA system. Nate's checklist of twenty things to check include checking your power source, battery backup and power supply all the way through to checking your computer, modem and landline or cell phone service. Spring Facts by Nancy Mueller

If you're anything like us, you've been looking forward to the return of better weather after being cooped up in the house all winter (and for much too much of 2020). Nancy Mueller, Controller of Energenecs collects interesting facts and sends them out to the Energenecs team on Fridays. Read her latest about how the start of spring in the Northern Hemisphere coincides with the vernal equinox, the origin of spring cleaning and "Spring fever" plus facts about team member (and black belt!) Nancy at energenecs.com/mueller

Welcome Erica Roller to the Team!

Erica recently joined Energenecs as a Project Coordinator. In a nutshell, a Project Coordinator makes sure everyone is on track. Following up with clients, vendors and contractors (as well as internal staff) to make sure everyone is getting what they need. Erica makes sure all are informed, to get the projects done. Erica and her husband raced jet skis around the midwest (before kids) and she competed in the World Finals. Her family rides jet skis, but only for fun now! Read more about Erica at energenecs.com/roller

Meet Alex Muench

Project Manager

Alex joined the team in 2018 as a Project Manager. He basically provides a lot of coordination between manufacturers and vendors, along with the Energenecs team and controls guys to make sure everything jives. He reviews plans and specs, coordinates approval with customers (contractors and engineers), and orders the appropriate equipment. He strives to make sure the finished project is exactly what the customer needs and all parties are happy with the finished product.

He says he really enjoys working at Energenecs because you deal with so many projects with a lot of variance and learn about all the different equipment and processes at a treatment plant. Alex states:

“It is very rewarding when I finish a project that I was very hands-on with, then hear that everyone is happy with it. You run into that often! We develop good relationships with the operations teams at plants, and our service team does a good job making sure they feel comfortable and supported.”

During his time off, he loves to ski and snowboard. His dad grew up skiing, and he taught everyone in thier family when they were kids. He would choose a mountain over a beach almost every time! Alex's favorite has been Whitefish in Montana, it's so remote, and the views of Glacier National Park are outstanding. The mountains seem to go on for as far as the eye can see.
