

## Suring Well Brought Back to Life!

Suring Public Works Department had a deep well and water filter plant which was designed for arsenic removal. There were issues with the filters plugging and not performing as it should. Energenecs was brought in to assist this problematic well and filter system with an updated controls system. Read more about this

unique project at [energenecs.com/suring](https://energenecs.com/suring)

## Doralee Piering wins WWOA Service Award

The Wisconsin Wastewater Operators' Association (WWOA) Albers-Templeton Service Award is presented to a person who has made an outstanding contribution to the WWOA in the areas of promotion, operation, management, program participation, or education. This year, Doralee Piering, office coordinator at Energenecs,

was presented with the award for her volunteer work producing the Clarifier magazine, along with Jon Butt and Ron Dickrell. WWOA recently renamed the service award to the Albers-Templeton Service Award. Read more at [energenecs.com/award](https://energenecs.com/award)

## Mayhem at Energenecs!

Mayhem paid a visit at Energenecs at their annual Halloween Chili Dump. Everyone brings in their favorite chili and they are all combined into one batch for a delicious lunch with all the fixins! Also seen was a guy being pulled up by his boot straps (Alex Muench), Bob Ross (Steve George), a pirate (Nancy Mueller), a cow (Paula Pierron), a

dinosaur (Debbie Hyke), twister game (Gary Dean), Elwood (Tim Onderin) and the winner of the costume contest, Mayhem (Joel Brill). Read more at [energenecs.com/mayhem](https://energenecs.com/mayhem)

## Energenecs Welcomes Debbie Hyke

Debbie Hyke recently joined the Energenecs tech sales team serving the northwest side of Wisconsin from Madison on up. After completing her Civil/Environmental degree she worked for Envirex out of Waukesha. Debbie worked mainly in biological processes and in learning the business of water treatment equipment. She

enjoys solving problems and helping treatment plants clean their water and is very happy to be working for Energenecs serving customers and helping to solve their needs. Read more at

## Meet Brian Akason

Technical Sales

Brian recently celebrated his 24th anniversary at Energenecs. He has been around SCADA systems since the early 1990s, when programmable logic controllers were just starting to be used for water and wastewater control systems. Also, using radios wired to PLCs for long distance communications was almost unheard of back in the early 1990s.

When he started with Energenecs, it was not a control system integration company, but more of a rep firm for process equipment with some electrical services. Energenecs has grown into a bonafide high quality system integrator that also represents water and wastewater process equipment, which is very unique around the country. Brian remarks

“I've had the privilege of working alongside tremendously talented electrical engineers, contractors, SCADA technicians and programmers over my career. I've learned a lot simply by listening to them and tackling projects from small rural water systems, to very large and complex wastewater treatment systems.”
