

Top 10 Tips for Operators from Our Experts

Nearly 300 years ago, Benjamin Franklin said, "An ounce of prevention is worth a pound of cure." Although he was referring to house fire prevention, this phrase is applicable to wastewater operations. The cost of maintenance is generally far less than the cost of fixing an issue during a crisis. We asked Tom Robarge, SCADA Technician, Craig Sampo, Lead Service Technician and Nate Wolfe, SCADA Technician at Energenecs for their advice to operators for maintaining their systems. Here are their top ten tips: Read more details at energenecs.com/tips

- ☑ Maintain Lift Stations
- ☑ Test Float Backup Circuits
- ☑ Check Field Devices
- ☑ Test Alarm Notifications
- ☑ Reboot Your Computers
- ☑ Check your SCADA System
- ☑ Buy Software Service Contracts
- ☑ Test Your UPS Batteries
- ☑ Calibrate Your Meters
- ☑ Flush Water Tower Sensing Lines

Energenecs Visits WANGEN America

Emily Vebber, Debbie Hyke, and Kevin LaPeau visited WANGEN America headquarters for training of their latest products including the Xpress pump which features service-in-place. When removing/installing the rotor/stator, there is no need to remove the Xpress from the piping system! Learn more at energenecs.com/wangen

Summer Sounds!

Energenecs is a sponsor of Summer Sounds, a 10 week music festival that boasts a reputation as a "must attend" summertime event in Cedarburg. In a town that loves to party, summer sounds throws one of the best. Located at Cedar Creek Park on Fridays from 6:30-10pm. Check out the lineup at summersounds.net

Energenecs Welcomes Nick Johnston

Energenecs recently hired Nick Johnston as a project manager. He graduated from MSOE (Milwaukee School of Engineering) and his initial interest in engineering actually came from the TV show, Mythbusters! He is currently working on a pump station control panel and has been helping out with other projects as needed including

Huber fine screens, RTUs and MCCs. In his spare time he likes to read, play video games and is in a softball league. Read more about Nick at energenecs.com/johnston

Meet Gary Dean

Aftermarket Sales

Gary recently celebrated an impressive 33 Years at Energenecs in Aftermarket Sales!

The Aftermarket Team is responsible for providing repairs, maintenance and consumables for water and wastewater equipment. Energenecs has original project files dating back to the late 1970s, which provides the Team with a valuable resource to better serve customers.

Once the capital sales team, who are out on the road, have sold a piece of equipment, and after the warranty has passed, is when customers call the aftermarket team. When customers want replacement parts or service to keep their equipment running, they call this department. So they basically cover repairs, maintenance and consumables. Gary remarks:

"You learn quite a bit from doing it for so many years. Because of the knowledge I have, I am able to get through issues in a very quick fashion. I know who to go to, to get things taken care of as quickly as possible, then go on to the next. I've developed that skill over the years."
