

Sparta Boosts Biogas Yield by 25%

The Sparta, Wisconsin WRRF has increased biogas yield by 25% after installing a modern mixing system. The facility's aging infrastructure and inefficient digesters had limited biogas production and required frequent maintenance. Replacing the old system with Landia's external GasMix technology—featuring venturi nozzles

and a chopper pump—has dramatically improved mixing, reduced debris buildup, and simplified maintenance. With all components now located outside the tanks, the plant benefits from safer, more efficient operations and reduced downtime.

Tech Pick: E+H Liquistation (Sampler)

When Energenecs' service techs need a reliable automatic sampler, they go with the E+H Liquistation CSF34. With over a decade of hands-on experience, the team finds it unmatched for performance, simplicity, and cost.

Craig Sampo, Lead Service Technician at Energenecs, remarks "I've worked with pretty much the gamut of samplers, when we started using this one, it stood out immediately. The biggest thing was the ease of maintenance and the low cost of keeping the unit running... everybody I've installed one for has absolutely loved it".

Meet Ethan Banks, Sales Application Engineer

Ethan recently joined the Energenecs team as a Sales Application Engineer. He brings hands-on experience from his time working with two water treatment equipment manufacturers. At Energenecs, Ethan works closely with the sales team to review project specs, develop bid proposals, and help customers find the right

solutions for their systems. Ethan once interned with the U.S. Forest Service in the Sierra Nevada mountains—an experience that shaped his outlook on environmental impact and resource management.

Meet Danny Villegas

Service Manager

Danny joined the Energenecs team last spring as our Service Manager, and he's been instrumental in keeping things running smoothly. He leads our team of field technicians, coordinates service schedules, and ensures our customers receive expert support.

Danny earned his MBA from the University of Dayton and currently serves as the community leader for the Milwaukee alumni committee.

Prior to joining Energenecs, he worked for the nation's second-largest automotive aftermarket company—a position that brought him to Wisconsin. Speaking about his current role at Energenecs, Danny shares:

“One thing I really enjoy is staying in close contact with the service team, and the parts team. Building that cohesiveness is something I really value. I try to foster an environment where people feel comfortable and trusted. That kind of unity and trust is a big deal to me, and I put a lot of focus on that.”
